

## Important Disclosure Regarding this Interview

This interview is for informational purposes and shall not constitute an offer to sell, or a solicitation to buy, any security, product, or service from Headwaters Capital. The opinions expressed in this interview represent the current views of Headwaters at the time of the interview and are provided for limited purposes, are not definitive investment advice, and should not be relied on as such. Headwaters Capital does not guarantee the accuracy, adequacy, or completeness of any information discussed during this interview and the viewer should not consider anything discussed in this interview as investment advice.

Opinions and other information discussed in this interview are subject to change. Any forward-looking statements made during this interview speak only as of the date of the interview, and the Firm assumes no duty to the viewer to update forward-looking statements or any other information provided during this interview. Forward-looking statements are subject to numerous assumptions, risks, and uncertainties, which change over time. Actual results could differ materially from those anticipated in forward-looking statements. There is no guarantee that targeted returns of any sector or security discussed in this interview will be realized or achieved or that an investment strategy will be successful. Individuals should keep in mind that the securities markets are volatile and unpredictable. Therefore, investing in securities or other types of investment products involve a high degree of risk. There are no guarantees that the historical performance of an investment, portfolio, investment product, fund, or asset class will have a direct correlation with its future performance, and past performance does not guarantee future results.

Investing in small- and mid-size companies can involve risks such as less publicly available information than larger companies, volatility, and less liquidity. Investing in a more limited number of issuers and sectors can be subject to greater market fluctuation. Portfolios that concentrate investments in a certain sector may be subject to greater risk than portfolios that invest more broadly, as companies in that sector may share common characteristics and may react similarly to market developments or other factors affecting their values.
